

CALL FOR PAPERS

ICAMSNE 2020
Aug 04-05, 2020
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMSNE 2020 : International Conference on Advances in Material Science and Nanostructure Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Material Science and Nanostructure Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials Science and Engineering:

Energy Materials

Mining and Metallurgy

Surface Science and Engineering

Biomaterials and Tissue

Engineering

Materials Chemistry and Sustainable

Chemistry

Biophysics and Systems Biology

Electronic, Optical and Magnetic

Materials

Advances in Instrumentation

Technology

Polymer Science and Materials

Emerging Areas of Materials

Science

Composite Materials

Big data in Materials Science

Metamaterials, Metadevices, and

Metasystems

Advances in Nano Materials Science

Advances in Dielectric Materials
and Electronic Devices

Graphene Materials and
Technologies

Industrial Coating Materials

Ceramic Materials

Reconfigurable Materials and

Molecular machines

Novel Materials for Energy

Applications

Soft Matter-rich Materials Science

Smart Materials

Solid State and Materials Science

Nanostructure Engineering
