

# CALL FOR PAPERS

**ICNN 2020**  
**Aug 04-05, 2020**  
**Montreal, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNN 2020 : International Conference on Nanosensors and Nanoelectronics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanosensors and Nanoelectronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanosensors	Carbon nanotube/polymer composite nanosensors
Nanodevices, nanoelectronics and nanosensors	Microcantilever sensors
Nanotechnology-enabled sensors	Bionanosensors
Nanowire field-effect sensors	Optical-based nanosensors
Metal nanoparticle sensors	Nanoscale sensing systems
Magnetic nanoparticle sensor	DNA-based sensors
Noble metal nanoparticles	Protein-based sensor
Carbon nanotube sensors	Redox-based sensors
Carbon nanotube gas sensors	Polymer nanoparticle sensors
Carbon nanotube sensors	Microgel/metal nanostructures
Carbon nanotube biosensors	Semiconductor nanoparticle sensors
