

CALL FOR PAPERS

ICWHS 2020
Aug 27-28, 2020
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWHS 2020 : International Conference on Wireless Healthcare Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Healthcare Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wireless healthcare
Mobility in healthcare
Healthcare wireless networks
Wireless sensor networks for healthcare
Wireless health care monitoring
Vital sign monitoring in hospitals
At-home and mobile aging
Large-scale in-field medical and behavioral studies
Wireless body area networks for healthcare applications
Cloud computing based systems for healthcare
Intelligent wireless health monitoring systems

Wireless patient monitoring in mobile health
Mobile phone sensing system for health monitoring
Wireless biosensors used in mobile
Wireless wearable sensor systems
Wearable and implantable sensors for healthcare
Wireless communications in healthcare
Data fusion and context elaboration
Privacy and security issues in wireless healthcare
Energy efficiency in health monitoring in wireless healthcare
Artificial intelligence and expert systems in wireless healthcare
