

CALL FOR PAPERS

ICRAMIR 2020
Aug 27-28, 2020
Sydney, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAMIR 2020 : International Conference on Recent Advances in Mechatronics and Intelligent Robotics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Mechatronics and Intelligent Robotics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Automatic control	Sampled-data control systems
Adaptive control	Semi-autonomous systems
Control systems and applications	Stochastic control and filtering
Digital control	System identification
Fault detection and isolation (FDI)	Systems and automation
Industrial automation	Virtual instrumentation and control
Instrumentation and control components	Mechatronics
Intelligent control	Mechatrical systems
Linear and nonlinear control systems	Decision support systems
Neuro-fuzzy control	Human-machine interface
Optimization and optimal control	Mechatronic and embedded systems
Process control	Mechatronic design
Robust control
