

CALL FOR PAPERS

ICCEASI 2020
Aug 06-07, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEASI 2020 : International Conference on Civil Engineering, Architecture and Sustainable Infrastructure is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Engineering, Architecture and Sustainable Infrastructure. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil and Hydraulic Engineering

Dam construction

Small-medium scale reservoir design
and construction

Canal buildings

Optimal design of civil and
hydraulic reinforced concrete
structure

Dynamic analysis of civil and
hydraulic structures

Non-destructive inspection of civil
and hydraulic structures

Advanced technology for enhancement
and repair of civil and hydraulic
structure

Protection and management of
watercourse

Harbor design and construction

Shoreline protection

Structural durability in ocean
environment

Design of foundations in seismic
environments

Hydraulic tunnel and underground
structures

Urban rainwater engineering

Urban dewatering engineering

Urban sewage disposal engineering

Water resources and environment

Pollution of water systems

Costal erosion, repairing and
protection

Architecture and Architectural
Structures

Creative and optimal design and
construction

Performance based design

Green Building

Tall buildings
