

CALL FOR PAPERS

ICAGC 2020
Sep 24-25, 2020
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAGC 2020 : International Conference on Advanced Green Composites is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Green Composites. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green composites
Green composite materials
Sustainable green composites
Wood based composites
Bamboo based composites
Other plant fiber composites
Bioresins and biopolymers derived from natural resources
Fiber treatment and resin modification for biocomposites
Cellulose and nanocellulose composites
Green composite fabrication, characterization, evaluation, and application
Life cycle assessment
Natural fiber sources
Alternative fiber sources

Natural polymer sources
Green fiber thermoplastic composites
Re-use, recycling and degradation of composites
Reprocessing of composites
Recent developments in green composites based on plant fibers
Green composites from natural resources
Green composite material evaluation and processing
High performance green composites
Green composites for engineering applications
Hybrid green composites
Tensile and compression properties of green composites
Mechanical and dynamic mechanical analysis of green composites
Commercial and experimental green composites
