

CALL FOR PAPERS

ICGAS 2020
Sep 16-17, 2020
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGAS 2020 : International Conference on Groundwater and Aquifer Storage is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Groundwater and Aquifer Storage. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Surface water/groundwater/ecosystem interactions

Water level declines or rises

Water quality in aquifers

Groundwater flow characterisation

Contaminant load modeling

Leaching to groundwater

Aquifer storage and recovery

Integrated modelling of groundwater systems

Impact of land use and climate change

Groundwater systems management

Surface contamination of shallow and deep aquifers

Impacts of mining

Hydraulic fracturing

Groundwater protection

Groundwater monitoring

Disposal of brines produced with oil and gas extraction

Deep injection of waste water

Confined and unconfined aquifers
