

## **CALL FOR PAPERS**

ICMMDSM 2020 Sep 16-17, 2020 Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMDSM 2020: International Conference on Mine Mechanization and Deep Sea Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mine Mechanization and Deep Sea Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Deep sea mining and exploration Environmental aspects of seafloor minerals Mine mechanization and ventilation Environment, regulations and technology Modelling, simulation and optimization Legal aspects of seafloor mineral development Process control and optimisation Mining systems simulation Moving towards production Risk assessment and management in sea mining Sustainable development of seabed mineral resources

Sustainable seabed mining
Seafloor massive sulphides and
manganese nodules
Ferromanganese crusts
Polymetallic nodules
Mining the seafloor and the
potential for growth
Economics and finance of deep sea
mining
Environmental impacts of seabed
mining
Developments in exploitation
technologies for seabed mining
Practical guidance from regional
government authorities
