

# CALL FOR PAPERS

**ICRRMA 2020**  
**Sep 24-25, 2020**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRRMA 2020 : International Conference on Radio Resource Management Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Radio Resource Management Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Radio resource management  
Radio resource allocation and interference  
Future trends in radio resource management  
Flexible radio assignment and redundant radios  
Radio resource management in cellular systems  
Mobile data mining for radio resource management  
Dynamic channel assignment

Transmit power control algorithm  
Coverage hole detection and mitigation algorithm  
Radio resource management in 5g networks  
Agile radio resource management techniques  
Radio resource management in wireless networks  
Radio resource management algorithms
