

CALL FOR PAPERS

ICSCEA 2020
Sep 03-04, 2020
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCEA 2020 : International Conference on Steel Construction Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Steel Construction Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

High performance structural steel
Material quality and control
Cold formed steel
Non structured steel
High tensile strength steel
Advanced steel casting techniques
Future trends in steel structures

Advanced sustainable material
Unique steel structures - case studies
Sustainable steel structure
Composite construction
Connection design
Analysis of semi-rigid connections
