

# CALL FOR PAPERS

**ICSER 2020**  
**Sep 10-11, 2020**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSER 2020 : International Conference on Space Electronics and Research is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Space Electronics and Research. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Space electronics and telemetry  
Electronic engineering with space systems  
Electronics for space systems  
Design considerations for space electronics  
Materials for space electronics  
Space dynamics and missions  
Space system design  
Advanced guidance, navigation and control  
Launch vehicles and propulsion  
Antennas and propagation  
Fundamentals of mobile communications  
Principles of telecommunication and packet networks  
Space robotics and autonomy

Satellite communications fundamentals  
Satellite remote sensing  
Radio frequency systems and circuit design  
Space avionics  
Advanced signal processing  
Advanced mobile communications systems  
Microwave engineering  
Advanced satellite communication techniques  
Spacecraft structures and mechanisms  
Automatic control engineering  
Space environment and protection  
Advanced packaging for military and space  
SIP 2.5- 3D and wafer level packaging WLP
