

CALL FOR PAPERS

ICACST 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACST 2020 : International Conference on Autonomic Communication Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Autonomic Communication Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Autonomic communications
Autonomic networking
The emergence of autonomics
Network information and communications theory
Semantics, complexity, security and privacy
Co-ordination and emergent behavior
Multi-agent systems

Decentralized algorithms
Verification and validation
Cognitive, user interface and media theories
Analysis and design of autonomic algorithms
Trust issues in algorithm design
Context awareness and semantics in communication
Novel co-ordination and communications programming models
