

CALL FOR PAPERS

ICAMCD 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMCD 2020 : International Conference on Advanced Mathematics for Complex Data is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Mathematics for Complex Data. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematics for complex data
Inference from graphical data
Transfer learning and multi-task
learning in deep convolutional
networks
Data-driven banking

Multiscale methods for parabolic
equations
Data-driven discovery of partial
differential equations
Multivariate methods in topological
data analysis
The algebraic geometry of
bottlenecks
