

CALL FOR PAPERS

ICAPRS 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPRS 2020 : International Conference on Atmospheric Physics and Remote Sensing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Atmospheric Physics and Remote Sensing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Atmospheric physics
Remote sensing
Cloud physics
Atmospheric electricity
Physical and chemical processes
Radiation, optical and electrical effects
Precipitation and cloud microphysics
Atmospheric dynamics and general circulation

Synoptic meteorology
Atmospheric dynamics and general circulation
Weather systems in specific regions
Atmospheric energetics
Numerical modeling and forecasting
Physical and chemical processes in the atmosphere
Radiation, optical effects, electricity
Atmospheric turbulence and transport processes
