

CALL FOR PAPERS

ICARC 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICARC 2020 : International Conference on Augmented Reality for Construction is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Augmented Reality for Construction. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Augmented reality in construction engineering
Virtual reality and augmented reality in construction
Augmented reality for construction site monitoring and documentation
Implementing augmented reality in construction
Business logic challenges

Limited use of contextual information
Complexity and capabilities of tracking technologies
Level of detail required for augmented reality content
Human interface issues challenges for users wearing safety gloves
Positional accuracy of field augmented reality devices
