

CALL FOR PAPERS

ICBDANGSMA 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBDANGSMA 2020 : International Conference on Big Data Analytics in Next Generation Smart Manufacturing Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Big Data Analytics in Next Generation Smart Manufacturing Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Predictive models for better forecasting, condition monitoring, manufacturing defects identification and remediation
Big data analytics for supply chain management in service or manufacturing sector
Big data analytics for smart logistics in service or manufacturing sector
Big data analytics for smart operations in service or manufacturing sector
Big data analytics for product design and development
Big data analytics for operations/service improvement using customer reviews

Open data analytics for consumer behavior/preference elicitation and analysis
Big data analytics related to product tracking for efficiency improvements
Big data visualization framework for logistics, manufacturing and service operations
RFID-enabled real time decision making in manufacturing/service environments
Big data analytics for product lifecycle management and innovation
Big data analytics for supply chain resilience and risk management
