

CALL FOR PAPERS

ICBET 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBET 2020 : International Conference on Biotelemetry Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biotelemetry Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biotelemetry	
Biotelemetry engineering and technology	
Biotelemetry research and experiments	
Biotelemetry and biomedical engineering	
Biotelemetric methods	
Radio signal transmission and antenna theory	
Telemetric technology, regulations and management of frequencies	
Ethics and animal welfare in biotelemetry and biologging	
VHF-based telemetry and GPS-positioning systems in biotelemetry	
Transmitters applications and limitations	
	Telemetry and biologging equipment
	Maps, mapping and GPS technology
	Acoustic telemetry, methods and science questions
	Marine mammal biotelemetry
	Linking marine mammal telemetry and the environment
	Remote methods in sea bird research
	Fish tracking and physiological telemetry
	Components of biotelemetry systems
	Current trends in biotelemetry
