

CALL FOR PAPERS

ICCEM 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEM 2020 : International Conference on Channel Estimation Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Channel Estimation Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Channel estimation	Channel estimation and equalization
Channel state information	Conventional training-based methods
Channel estimation techniques	Optimal training design
Channel models and estimation techniques	Enhanced training-based methods
Channel estimation in mobile wireless systems	General algorithm
Synchronization and channel estimation	Channel estimation for SISO
Channel estimation and detection	Channel estimation for 2 x 2 MIMO
Optimal channel estimation and training design
