

# CALL FOR PAPERS

**ICCOMCC 2020**  
**Sep 21-22, 2020**  
**Toronto, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCOMCC 2020 : International Conference on Chemical Oceanography and Marine Carbon Cycle is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Oceanography and Marine Carbon Cycle. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical oceanography  
Chemical components  
Reaction mechanisms  
Geochemical pathways  
Solid earth and the atmosphere  
Material inputs to and outputs from marine waters  
Orthochemical and biological production  
Transformation of chemical compounds  
Phases within the marine system  
Determination of reaction rates and study of equilibria

Constituents of seawater  
The salinity of seawater  
Conservative elements  
Bioactive elements  
Adsorbed elements  
Ocean circulation  
Wind-driven circulation  
Thermohaline circulation  
Ocean biology
