

CALL FOR PAPERS

ICCSIS 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSIS 2020 : International Conference on Computer Science and Intelligent Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Science and Intelligent Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

pattern recognition
information processes and
technologies
intelligent software
databases and knowledge bases
the principles of decision making
expert systems and problem solvers
modeling in technology, natural
sciences and humanities
discrete optimization;
mathematical biology and
evidence-based medicine;
bioinformatics

theory of discrete functions
automata and robots with elements
of artificial intelligence
computers and neurocomputers
fuzzy mathematics and applications
computer algebra
computer geometry
coding theory and cryptography
parallel computing;
mathematical economic
