

CALL FOR PAPERS

ICRSEP 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRSEP 2020 : International Conference on Retaining Structures and Earth Pressure is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Retaining Structures and Earth Pressure. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Earth retaining structures
Earth retaining structures and
asset management
Innovative technology
Design and construction of soil
nail walls
Design of retaining structures
Different types of soil retaining
structures
Practice for earth retaining
structures
Earth pressure and earth-retaining
structures
Deep foundations and earth
retaining structures
Earth retaining structures
software

Soil behavior and soil properties
Factors affecting earth pressure
Water and retaining structures
Global and local instability
Gravity walls
Semi gravity retaining wall
Flexible walls
Special type of retaining walls
Concrete masonry retaining walls
Segmental retaining walls
