

CALL FOR PAPERS

ICTDM 2020
Sep 21-22, 2020
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTDM 2020 : International Conference on Two-Dimensional Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Two-Dimensional Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Two-dimensional materials

Graphene and graphene-derived materials

Boron nitride, carbon nitride

Transition metal dichalcogenides, MXenes

Black phosphorus, silicene and germanene/silicane and germanane

2D topological insulators

Oxides/hydroxides

Heterostructures and composites

Applications: energy, environment, electronics, biology, etc.
