

CALL FOR PAPERS

ICBFCT 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBFCT 2020 : International Conference on Battery and Fuel Cell Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Battery and Fuel Cell Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Fuel cell technology	Cell and stack technology
Applications of fuel cell engineering	Fuels and fuel infrastructure
Fuel processing for fuel cells	Fuel cell systems and applications
Proton exchange membrane fuel cells	Fuel processing
Direct methanol fuel cells	Modelling and control
Membrane fuel cell system modeling and control	Fuel cell components
Analysis and evaluation of ageing phenomena	Proton exchange membrane fuel cells (PEMFCs)
Modeling the steady state and dynamic characteristics	Phosphoric acid fuel cell (PAFC)
Analysis, optimization and control of fuel cell systems	High-temperature fuel cells
Fuel cell electrochemistry	Comparison of fuel cell types
Materials for fuel cells	Efficiency of leading fuel cell types
