

# CALL FOR PAPERS

**ICCA 2020**  
**Sep 23-24, 2020**  
**Vancouver, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCA 2020 : International Conference on Computational Astrochemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Astrochemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Potential energy surfaces of  
species relevant in astrochemistry  
Thermodynamics of reactions  
relevant in astrochemistry  
Calculation of kinetic parameters  
associated with reactions relevant  
in astrochemistry

Modelling dust and icy grain  
structures and properties  
Modelling processes at the grain  
surfaces
