

# CALL FOR PAPERS

**ICCOP 2020**  
**Sep 23-24, 2020**  
**Vancouver, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCOP 2020 : International Conference on Computer Organization and Programming is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Organization and Programming. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer engineering  
Electrical engineering and computer science  
Computer organization  
Components  
Programming  
Computer systems  
Operating systems and application systems  
Memory, process and cpu management  
Single contiguous memory management  
Partition memory management  
Paged memory management  
Design and implementation  
Ram and rom

Computer software  
Computer architecture  
Memory  
Arithmetic/logic unit  
Input/output units  
Control unit  
Simple logic gates  
Review of gate processing  
Constructing gates  
Computer hardware and software  
Hardware platforms  
Software applications
