

CALL FOR PAPERS

ICCSDA 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSDA 2020 : International Conference on Computational Statistics and Data Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Statistics and Data Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advances in Mixture Models
Analysis of Symbolic and Structured Data
Applications in Macro-Economics, Finance and Marketing
Association Rules
Bayesian Computation methods
Biostatistics and Bio-computing
Business Intelligence
Categorical Data Analysis
Classification and Discrimination
Clinical Trials
Clustering
Computational Bayesian Methods
Computational Econometrics

Computational Methods for Industry
Computational Methods in Official Statistics
Computational Statistics in Finance
Computational Statistics Teaching
Computer-intensive methods for dependent data
Data Analysis Techniques for Evaluating Trading Strategies
Data assimilation and its application
Data Mining
Data Streams and Massive data
Design of Experiments
Dimensionality Reduction
Econometrics and Statistical Finance
Environmental Statistics and Climate Change
