

CALL FOR PAPERS

ICEMBO 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEMBO 2020 : International Conference on Experimental Marine Biology and Oceanography is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Experimental Marine Biology and Oceanography. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Experimental marine biology
Field experiments in marine ecology
In situ approach to marine behavioral research
Comparative physiology in marine biology
Comparative endocrinology in marine biology
Comparative biochemistry and marine biochemistry
Conversion of the inorganic constituents of the environment
Venomous and poisonous marine animals
Development in marine organisms

Marine life and evolution
Taxonomy of marine organisms
Marine ecosystems, populations and ecology
Population growth and biological interactions
Conservation of marine biodiversity
Conservation of marine environment
Conservation of terrestrial environment
Human impacts on the marine environment and management
Environmental factors that affect marine organisms
