

CALL FOR PAPERS

ICGCCE 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCCE 2020 : International Conference on Geosynthetics in Civil and Construction Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geosynthetics in Civil and Construction Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Construction and manufacturing
Durability of geosynthetics
Geosynthetics and ground engineering
Geosynthetics in civil engineering
Limited design life in geosynthetic materials
Multi-functional uses of geosynthetics in civil engineering
National and international standards governing geosynthetics
Quality assurance for geosynthetic materials

The design principles of geosynthetics
The durability of geosynthetics
The material properties of geosynthetics
The use of geosynthetics as barrier materials in civil engineering
The use of geosynthetics as filters in civil engineering
The use of geosynthetics as separators in civil engineering
The use of geosynthetics in landfill applications
The use of geosynthetics to improve the performance of foundations in civil engineering
