

CALL FOR PAPERS

ICGEPTR 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEPTR 2020 : International Conference on Gene Expression and Post-Transcriptional Regulation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Gene Expression and Post-Transcriptional Regulation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Gene expression
Mechanism of gene expression
Transcription
RNA processing
Non-coding RNA maturation
RNA export
Translation
Folding
Translocation
Protein transport
Regulation of gene expression
Transcriptional regulation

Transcriptional regulation in
cancer
Post-transcriptional regulation
Translational regulation
Post-translational modifications
Measurement in gene expression
mRNA quantification
Protein quantification
mRNA-protein correlation
Localization
Gene networks
Techniques and tools for gene
networks
Gene expression databases
