

# CALL FOR PAPERS

**ICISP 2020**  
**Sep 23-24, 2020**  
**Vancouver, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICISP 2020 : International Conference on Imaging and Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Imaging and Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |  |  |
|--|--|
| Image processing                                   | Morphological Processing                     |
| Image/Video Coding and Transmission                | Feature Extraction and Analysis              |
| Image/Video Processing and Analysis                | Interpolation and Super-resolution           |
| Image Formation                                    | Motion Detection and Estimation              |
| Image Scanning, Printing, Display and Color        | Computer Vision                              |
| Image/Video Storage, Retrieval, and Authentication | Pattern Recognition                          |
| Applications                                       | Content-based Image Retrieval                |
| Image and video processing                         | Signal Processing                            |
| Image Filtering                                    | Spectral Analysis                            |
| Restoration and Enhancement                        | Time-frequency and Time-scale Representation |
| Image Segmentation                                 | Filtering                                    |
| Video Segmentation and Tracking                    | Detection and Estimation                     |
