

CALL FOR PAPERS

ICMFD 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMFD 2020 : International Conference on Multicellulars, Function and Development is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Multicellulars, Function and Development. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multicellular organism
Multicellulars
Cellular mechanism
The origins of multicellular organisms
Developmental origins of multicellularity
Structure and function
Dynamic differentiation
Colonial organisms
Modular organisms
Microbial colonies
Bacterial colony
Cell migration
Complex multicellularity

Evolutionary history
Evolution of multicellularity
Mutational/functional genetics
Occurrence
Loss of multicellularity
Cancer
Separation of somatic and germ cells
Hypotheses for origin
The symbiotic theory
The cellularization (syncytial) theory
The colonial theory
The synzoospore theory
Gk-pid
