

CALL FOR PAPERS

ICNNEM 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNNEM 2020 : International Conference on Nanotechnologies, Nanomaterials and Electronic Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanotechnologies, Nanomaterials and Electronic Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanotechnologies and nanomaterials

Advanced alloy materials
Biomaterials and applications
Catalytic materials and applications
Electronic materials and applications
Energy materials
Graphene and applications
Light emitting materials
Magnetism and magnetic materials
Materials synthesis and characterizations

Materials theory and principles
Molecular systems and applications
Nanostructures and nanomaterials
Optoelectronic materials
Oxide materials
Photovoltaics photocatalysis materials
Plasmonics and applications
Polymers and applications
Quantum matters and applications
Sensors and applications
