

CALL FOR PAPERS

ICOFS 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOFS 2020 : International Conference on Offshore Foundations and Structures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Offshore Foundations and Structures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Offshore foundations
Foundation design, fabrication and installation
Offshore wind turbine foundations
Offshore renewable energy assessment and forecasting
Design of offshore foundations and structures
Geotechnical performance of offshore structures
Shallow foundations
Shallow foundations and bearing capacity theories

Gravity-based structure
Pile foundations and monopiles
Anchors for floating structures
Caisson foundations
Spudcans for jack-up rigs
Pipeline/rise-soil interaction
Well and conductor geotechnics
Offshore structures
