

CALL FOR PAPERS

ICSGSHA 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGSHA 2020 : International Conference on Earthquake Geology and Seismic Hazard Assessment is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Earthquake Geology and Seismic Hazard Assessment. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Earthquake geology	Seismic response analysis and behavior
Earthquake physics	Seismic fragility analysis
Earthquake, landslides and tsunami	Dynamic stress concentration
Geologic effects and records of earthquakes	Seismic reliability analysis
Earthquake engineering	Seismic damage analyses
Principles of performance-based earthquake engineering	Seismic effect
Seismic hazard and seismic risk analysis	Mechanical behavior
Passive energy systems	Seismic performance
Seismic isolation	Seismic risk assessment
