

CALL FOR PAPERS

ICSMSDA 2020
Sep 23-24, 2020
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMSDA 2020 : International Conference on Smart Manufacturing Systems Design and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Smart Manufacturing Systems Design and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced Vehicle Technologies
Advances in Production Management Systems
Business Process Management
Business Process Redesign and Information Systems Design
Complex Systems Engineering and Development
Complexity Management
Computers and Information in Engineering
Cyber-physical Environment and Infrastructure
Design and Engineering of Manufacturing Systems
Design and Production Information System Technology
Design Automation
Design Education
Design for Manufacturability and Assembly

Design for Manufacturing and the Life Cycle
Design of Production Systems
Design Theory and Methodology
Designing and Developing Products and Production Processes
Energy and Material Efficiency, Green Manufacturing
Engineering and Management of Manufacturing Systems
Ergonomics and Human Factors
Event-driven Production Planning and Control
Factories with Regional Roots, Regional Infrastructure
From Design to Maintenance of Information Systems
Frontiers in Biomedical Devices
Generative and Unconventional Technologies
Holistic Production Systems Beyond Conventional Notions
