

# CALL FOR PAPERS

**ICSSDT 2020**  
**Sep 23-24, 2020**  
**Vancouver, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSDT 2020 : International Conference on Spacecraft Systems, Designs and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Spacecraft Systems, Designs and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Spacecraft avionics systems,  
subsystems and technologies  
Space missions, systems, and  
architecture  
Antenna, RF/Microwave systems and  
propagation  
Communication and navigation  
systems  
Aerodynamic forces and structural  
flexibility  
Flight software engineering and  
testing  
Observation systems and  
technologies  
Remote sensing  
Spacecraft, launch vehicle systems  
and technologies  
Air vehicle systems and  
technologies

Software and computing  
Diagnostics, prognostics, and  
health management  
Ground and space operations  
Management, systems engineering and  
cost  
Unmanned and manned spacecraft  
systems  
Materials for spacecrafts  
High level panels  
Aerodynamic's fundamental  
concepts  
Aeronautical engineering
