

CALL FOR PAPERS

ICDSAQM 2020
Sep 16-17, 2020
Zurich, Switzerland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSAQM 2020 : International Conference on Data Science for Air Quality Monitoring is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Science for Air Quality Monitoring. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Characterization, status, and trend of air pollution at different cities, regions, or countries
Relationship of various air pollutants and with meteorological conditions
Understanding source and formation of air pollutants
Comparison of air pollutants at different regions or countries
Use of air quality monitoring data for health effects analysis
Use of air quality monitoring data for agricultural and ecosystem effects studies
Use of air quality monitoring data to validate chemical transport models, remote sensing models and other air quality related models
Comparison of different air quality monitoring instruments
The quality issues regarding use of the air monitoring data
