

CALL FOR PAPERS

ICECE 2020
Oct 22-23, 2020
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECE 2020 : International Conference on Eutrophication in Coastal Ecosystems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Eutrophication in Coastal Ecosystems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine coastal eutrophication
Processes controlling eutrophication
Impact of marine coastal eutrophication on humans and economic activities
Marine coastal eutrophication modeling, simulation and analysis
Global change and eutrophication of coastal waters
Causes, effects and solutions to eutrophication
Harmful algal blooms and eutrophication
Primary and secondary effects of marine coastal eutrophication
Phytoplankton
Submerged aquatic vegetation

Oxygen depletion
Invertebrate benthic fauna
Sources of high nutrient runoff
Point sources
Nonpoint sources
Soil retention
Runoff to surface water and leaching to groundwater
Atmospheric deposition
Prevention and reversal of eutrophication
