

CALL FOR PAPERS

ICERARM 2020
Oct 22-23, 2020
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICERARM 2020 : International Conference on Environmental Risk Analysis and Risk Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Risk Analysis and Risk Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental risk analysis
Environmental risks
Environmental risk assessment
Ecological monitoring
International monitoring
activities
Risk identification
Risk estimation
Risk evaluation
Risk reduction strategies
Habitat requirements
Management plan
Environmental assessment
requirement
Results of environmental risk
analysis

Potential impacts
Mitigation measures and impacts
remaining
Strengths of environmental risk
assessments
Limitations of environmental risk
assessment
Environment reporting
Assessing the effects of stressors,
often chemicals, on the local
environment
Organisms, populations or
ecosystems
New approaches
Risk management
The public institutions role in the
environmental risk assessment
Polluted sites reclamation
Risk scenario reconstruction
Site characterization
