

CALL FOR PAPERS

ICOMAM 2020
Oct 22-23, 2020
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOMAM 2020 : International Conference on Oceanography and Maritime Meteorology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Oceanography and Maritime Meteorology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Maritime meteorology
Marine weather forecasting
History
Importance of the wind
Development of warm ocean currents
Swell dispersion and wave groups
Sailing ship journeys
Oceanographic activities
Marine modeling and analysis
Tropical cyclone avoidance
Within numerical weather prediction
Ocean surface modeling
Observing platforms

Weather ships
Weather buoys
Weather satellites
Utility
Products available
Research of visual atmospheric phenomena
Instruments and classification scales
Atmospheric composition research
Research into cyclones and air flow
Observation networks and weather forecasting
Numerical weather prediction
Climatology
Statistical climatology
