

# CALL FOR PAPERS

**ICNCCE 2020**  
**Oct 22-23, 2020**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNCCE 2020 : International Conference on Network Coding and Computer Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network Coding and Computer Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Applications of network coding  
Architectural design and optimization aspects of network coding  
Cross layer paradigms in network coding  
Implementation and deployment aspects of network coding  
Index coding  
Information theory and fundamental limits of network coding  
Network code constructions and algorithms

Network coding for distributed storage  
Network coding for wireless communication  
Physical layer network coding  
Robustness, energy, feedback, or delay aspects of network coding  
Security and error correction for network coding  
Showcases of network coding
