

CALL FOR PAPERS

ICTSMA 2020
Oct 22-23, 2020
Bali, Indonesia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTSMA 2020 : International Conference on Telecommunication Systems, Modeling and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Telecommunication Systems, Modeling and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Configuration of ATM Networks
xDSL, Optical Access, HGI and Home
DVB
DSL and Cable Based Systems
Topological Design and Network
Configuration Problems
Design and Analysis of Local Access
Networks and Outside Plant
Problems
Time Dependent Expansion of
Telecommunication Systems
Telecommunication network
Reliability, Availability and
Survivability
Network Design Problems in Gigabit
and Terabit Networks
LAN, WAN Global Network
Interconnection
Artificial Intelligence/Heuristics
in Telecommunication Systems
Quantitative Methods in Network
Management
Performance Evaluation of
Telecommunication Systems
Distributed Computing and
Distributed Data Bases

International aspects of
telecommunications
Fiberoptics and photonics
Security and Privacy Issues in
Telecommunications
Telecommunication Standards
Protocols for Telecommunication
Decision Support Technologies in
Telecommunications
Designing and modeling high
availability networks
Mobility and Nomadicity
Adhoc wireless sensor networks
Broadband wireless networks
Cellular Systems and PCS Modeling
and Configuration
Advanced Antenna Technologies
Low and Medium Earth Orbit
Satellite Communication Systems
