

# CALL FOR PAPERS

**ICCSIE 2020**  
**Oct 07-08, 2020**  
**Beijing, China**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSIE 2020 : International Conference on Computer Science and Information Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer Science and Information Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |  |   |
|--|---|
| Algorithms                                 | Computer-Aided Design and Manufacturing |
| Artificial Intelligence and Expert Systems | Computer-Human Interface                |
| Bioinformatics                             | Computing Practices & Applications      |
| Business Technology Solutions              | Control Systems and Robotics            |
| Communication Technology                   | Control Technology                      |
| Computer and Information Security          | Data Compression                        |
| Computer and Wireless Networks             | Data Management                         |
| Computer Application                       | Data Warehousing/Data Mining            |
| Computer Architecture and VLSI             | Database Design and Development         |
| Computer Graphics, Animation, Games        | Database Technologies and Applications  |
| Computer Information Systems               | Decision Support Systems                |
| Computer Science and Technology            | e-Commerce                              |
| Computer Science Education                 | Emerging Programming Languages          |
