

CALL FOR PAPERS

ICGCDME 2020
Oct 19-20, 2020
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCDME 2020 : International Conference on Green Corridor Design, Management and Enforcement is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Corridor Design, Management and Enforcement. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Wildlife corridor
- Habitat corridor or green corridor
- Principles of wildlife corridor design
- Ecological effects of habitat fragmentation
- Corridor evaluation
- Corridor features
- Culvert design
- Vegetation restoration
- Management and enforcement
- Natural resource management
- Habitat connecting wildlife populations separated by human activities or structures
- Negative effects of inbreeding
- Reduced genetic diversity
- Re-establishment of populations
- Purpose of wildlife corridor
- Users
- Types of wildlife corridor
- Regional wildlife corridor
- Sub-regional wildlife corridor
- Local wildlife corridor
- Worst effects of habitat fragmentation
- Costs
- Monitoring use
- Design
- Examples
- Major wildlife corridors
