

CALL FOR PAPERS

ICRSGDA 2020
Oct 29-30, 2020
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRSGDA 2020 : International Conference on Remote Sensing, Geodesy and Data Acquisition Techniques is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Remote Sensing, Geodesy and Data Acquisition Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geodetic remote sensing
Data acquisition techniques
Remote sensing and geodetic measurements
Remote sensing measurements
Geographic information systems
Applications of remote sensing
Geodetic
Acoustic and near-acoustic
Data processing
Data processing levels

History
Remote sensing software
Geodetic surveying, to include geometrical and physical geodesy
Datums and coordinate systems
Space and surface geodetic techniques
Gravity and precise leveling
Uncertainty estimation
Error propagation
GPS data collection and analysis
Volcanic slope monitoring
