

CALL FOR PAPERS

ICDCE 2020
Oct 22-23, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCE 2020 : International Conference on Dependability and Computer Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dependability and Computer Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dependability engineering
Advances in dependability engineering
Software dependability
Durability, safety and security
Attributes, threats, and means
Dependability of information systems and survivability
Ambient system security

Current advances
Model-based development
Code-level assurance
High-level security requirements
Analyzing security configurations
Industrial applications
