

CALL FOR PAPERS

ICDRBDPS 2020
Oct 22-23, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDRBDPS 2020 : International Conference on Disaster Resistant Buildings and Disaster Prevention Strategy is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Disaster Resistant Buildings and Disaster Prevention Strategy. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Disaster resistant buildings
Design and construction disaster resistant buildings
Disaster management and planning
Earthquake-resistant design
Earthquake resistant structures
Flood and hurricane resistant buildings
Cyclone resistant buildings
Fire resistant building
Trends and projects
Building materials
Earthquake shelter
Concurrent shake-table testing
Combined vibration control solution

Steel plate walls system
Seismic test of seven-story building
Earthquake-resistant design concepts
Structural details
Architectural details
Types of earthquakes
Magnitude and intensity
Seismograph
Codes on earthquake resistant building design
Improving earthquake resistance of small buildings
Improving earthquake resistance of tall buildings
Disaster prevention strategy
Early warning system
