

CALL FOR PAPERS

ICMIMS 2020
Oct 22-23, 2020
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMIMS 2020 : International Conference on Media Informatics and Multimedia Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Media Informatics and Multimedia Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Media informatics
Applications of media informatics
Common or current topics in media informatics
Media informatics and communication engineering
Media informatics, information and communication systems
Communication channels and mobile devices
Designing user-friendly interfaces
Software and systems used in digital media
Digital media and multimedia technologies for media informatics
Media informatics and internet infrastructures
Media informatics and data communication
Digital interactive media

Management of information and information processing
Computer graphics/animation/visualization
Speech/image/video processing and technology
Game design in media and communication systems
Security and cryptography in media informatics
Media informatics and user privacy
Designing interactive systems
Cooperative work environments
E-business
Knowledge management and information systems
Virtual and augmented reality
Applications of software engineering in media informatics
