

CALL FOR PAPERS

ICBEILD 2020
Oct 29-30, 2020
Los Angeles, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBEILD 2020 : International Conference on Building Engineering and Innovative Landscape Designing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Building Engineering and Innovative Landscape Designing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Architecture history, theory and culture
Landscape performance
Landscape planning and ecology
Landscape form and function
Landscape ecology, natural drainage systems and constructed wetlands

Sustainable coastal margins, wildlife habitat conservation, green ways and other topics related to planning and characterizing the environment

People-environment relationships
Innovative ways to design, build, and/or restore, urban, suburban and rural environments that address ecological, social and economic issues associated with sustainability

Design of pedestrian space and alternative transportation, sustainable urbanism, active living by design and the arrangement of urban space and place
