

# CALL FOR PAPERS

**ICCBSD 2020**  
**Oct 29-30, 2020**  
**Los Angeles, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCBSD 2020 : International Conference on Component-Based Software Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Component-Based Software Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Component-based software  
Component standards  
Component models  
Component development for reuse  
Component-based development process  
and component lifecycle  
Design principles  
Differences from object-oriented  
programming

Component-based software  
architecture  
New technologies  
Component-based software  
engineering for embedded systems  
Aspect-oriented requirements  
engineering for component-based  
software systems  
Component-based software testing  
Component-oriented programming  
Reliability prediction for  
component-based software  
architectures
